The screenshot shows the 'Facebook Hacker v1.0' application window. The title bar reads 'Facebook Hacker v1.0 | HackingArticles.com'. The main interface has a blue background with the text 'facebook Hacker' and 'HackingArticles.com'. It contains several input fields: 'Email' (with 'something@gmail.com'), 'Passwd' (with '123'), 'smtp' (with 'smtp.gmail.com'), and 'Port' (with '587'). There are also radio buttons for 'Email' (Gmail, Hotmail, Custom) and checkboxes for 'Anti's' and 'Fake Msg'. A 'File Name' field contains 'server.exe'. At the bottom, there are 'Build', 'Credits', and 'Hacking Articles' buttons. Annotations with arrows point to specific fields: 'Email' (Create a fake email ID and Enter it here.), 'Passwd' (Enter the password of your fake email ID.), 'smtp' (Please Don't change any of these.), 'File Name' (Change the filename to anything you want.), and the 'Build' button (FINAL STEP: Click on "Build").

Create a fake email ID and Enter it here.

Enter the password of your fake email ID.

Please Don't change any of these.

Change the filename to anything you want.

FINAL STEP: Click on "Build"
